The Pure Accounts –

The balance sheet is high profits for the model accountant of a hospital – which is called Chartered Accountant which adds “If grace was in fact lived, it would have the feature of infinite happiness in recognition” this means in fact in accountant senses – how the hospital earning a lot of awardedness and the patient spending a high amount which is ethical as low as well – it means in fact that one recovers by a judgement – Balance – loss of spending (ethics per patient) and profit of company by cross to loss by patient which means crossed by – its graph is a lower amount of ethical spending made high as

psychoanalytic sessions and higher side of company profit which is a complex envelope of the idea of how it goes very high in the second half of the recovery plan as a grapheme as psychoanalysis calls it, but actually as a simple accountant joke – that the profit and simple ethical expenditure then is a image of the higher and lower aspects measured as ethics and higher prestige. The doctors themselves are higher as well.

Crossing the days – 30 days perhaps as a period – crossed with fifteen days crisis and fifteen days recovery with a complex per day schedule of in the next half we are in of in fact the last part of July now as August meaning on the process – higher freedoms in August which can be low only as Jewish violence of a type called Parsifal earlier becoming

Mozart – which I mean is how the news is also true – in crossing the day it means there is now no Parsifal.

__Standard Day_____Ethics_____

Higher Side of Life

Debit Debited – Low to High (per patient) Loss - None	Credit Credited (Maximal as recognised) Profit - High
Patient in ward,	Earnings for the

actually only ward or room payment	Ward
Payment of bills and doctoring	Awarded
Payment for medicines or psychoanalysis as one or two remarks	Style
